

Technical Data Sheet

Owatrol ATM 007 Anti moss cleaner with long lasting effect

Usage period:

- Optimal timing for treatment: between April and December
- After raining make sure to wait 12 hours before proceeding to the treatment and finish 48 hours before any rain forecast.

Cautionary warnings:

- Follow the manufacturer recommendations
- Wear correct protective equipment (glasses, suit, rubber gloves, mask...)
- After diluting the concentration with water (follow instructions precisely), stir gently, do not shake.
- Do not apply on glass surfaces or on thatched roofs
- Never rinse the surface after applying the product
- With very hot weather, humidify the surface to be treated in order to cool it down, let it dry before applying the product
- Be cautious when using biocide. Read the label recommendations carefully before using the product
- Avoid spraying near plants or flowers

Preparation of the surface for a curative treatment

Brush or scrape of the dirt as possible off the surface when it is accessible

Application

Curative treatment:

Generously apply diluted ATM 007, to saturate the moss and the thick lichen spots

2 options :

- Rinse after 48 hours with an HP washer cleaner (max 50 bar and min 50 cm above the surface to avoid any damage)
- Do not rinse. Let the weather take care of the residue. The effect should be visible within 10 to 15 days

Preventive treatment

Generously apply diluted ATM 007 all over the surface to be treated

Storage :

- 2 years in its original unopened container. Frost sensitive
- Do not dispose of this product sewers or rivers. Do not reuse the container.
